Subject: Microsoft Settlement

This misguided action by our government(s) should have ended long ago. As a litigation support specialist for Price Waterhouse, I participated in the last High Tech witch hunt by the DOJ against IBM (with Memorex' help). What a joke! We don't need protection from Microsoft. we need protection from our government! Let us decide ourselves whether to buy Microsoft's products, and then buy stock in the company if we think their profits are excessive. Why don't you guys go find some real criminals.

Please settle this monkey business as soon as possible.

Kevin Casey
